Provide professional services with data governance.

CGF is the foundation of a data management platform for Citizens.

CGF is the foundation for a data management platform for all data of citizens.

We build and sell software and operate profitable model and provide professional services to accelerate customer travel with true data governance.

We also run the CGF Club to host the CGF community for our clients and host annual Data citizens conference and data citizen city tour around the world.

CGF provides true data governance to businesses through its regional offices in U.S.A. and Europe and partners in Asia, the Middle East and South America.

This is true data governance.

CGF is a true data management.

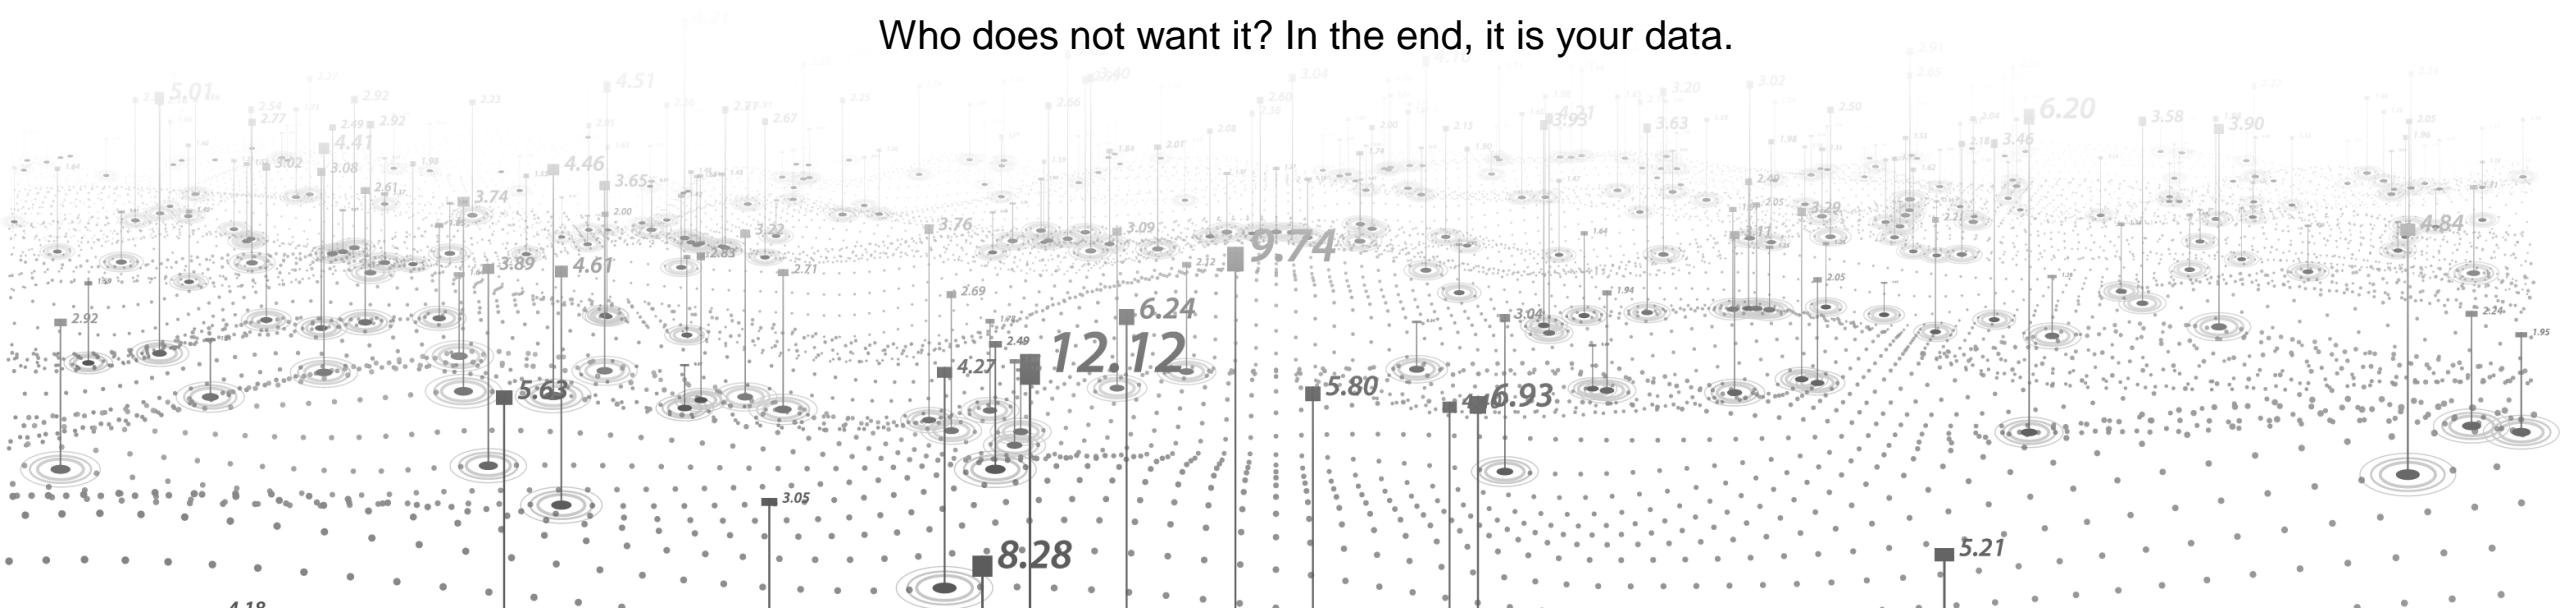

Data governance platform that provides openness and freedom.

It decomposes into existing data and opens up organizational data so that every user can find the data they need, collaborate on it, and easily understand what they mean.

Above all, CGF ensures that all data citizens can trust the data.

CGF has the full potential to drive a competitive advantage.

Who does not want it? In the end, it is your data.

Roadmap

April 2019 : Korea, China, Vietnam, Indonesia

May 2019 : Hong Kong, Thailand

June 2019 : Singapore, Malaysia

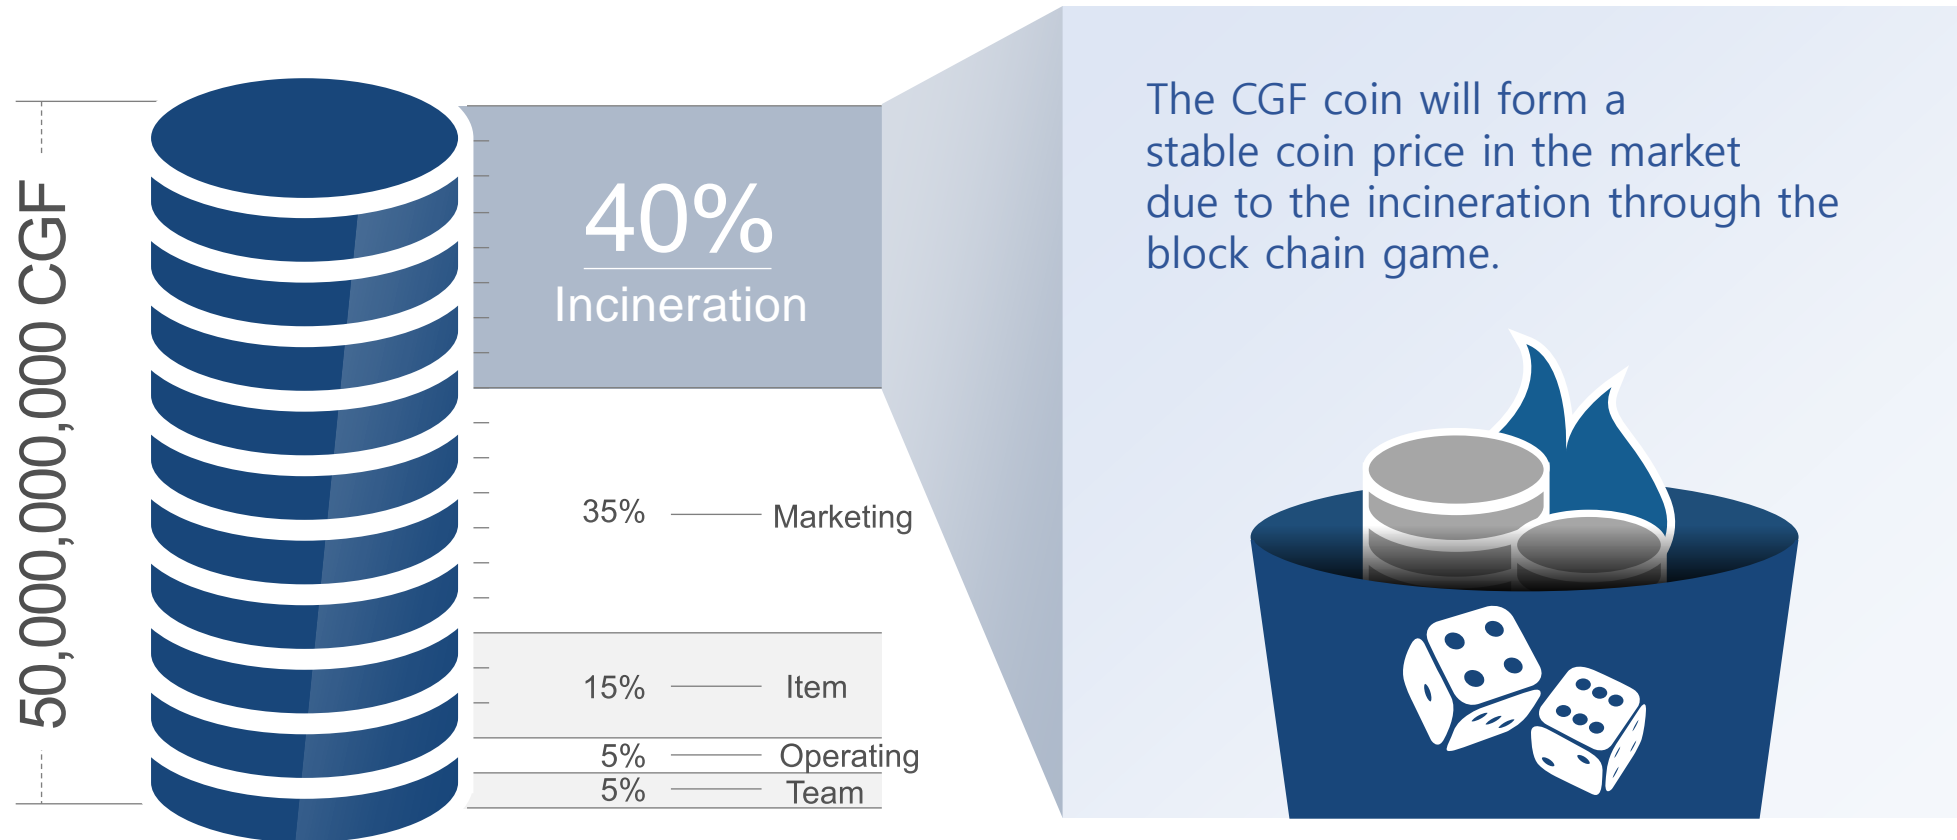

CGF is a coin issued based on ERC-20

It is a basic coin for the exchange, financing, and finance necessary for the block-chain game.

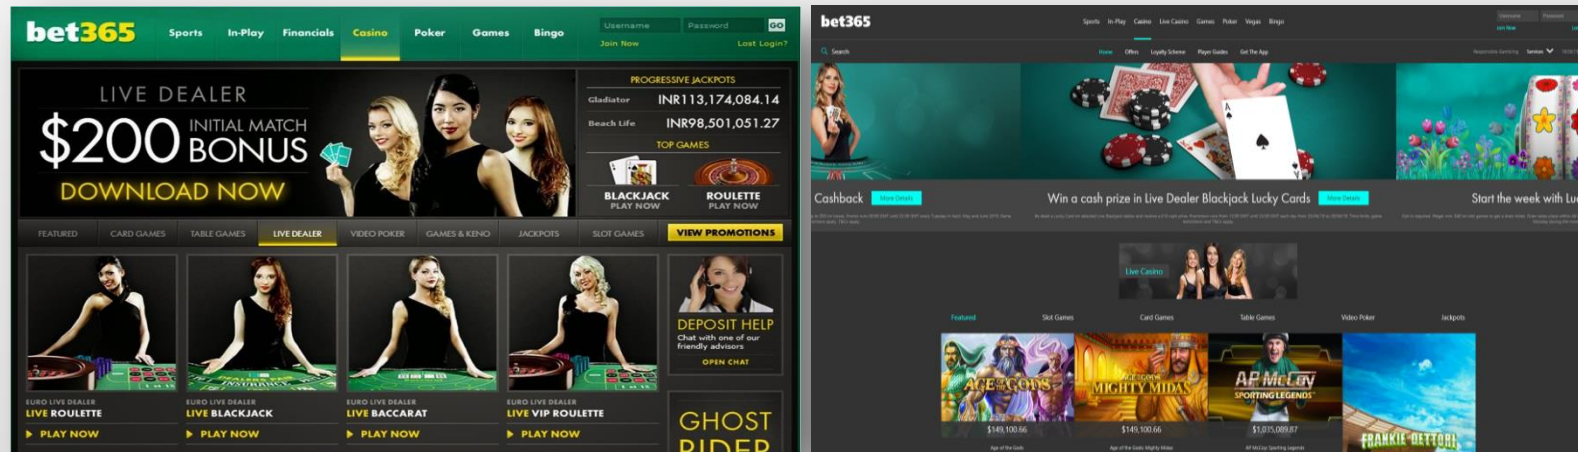

CGF is the best secured cryptocurrency based on Ethereum ERC-20 technology.

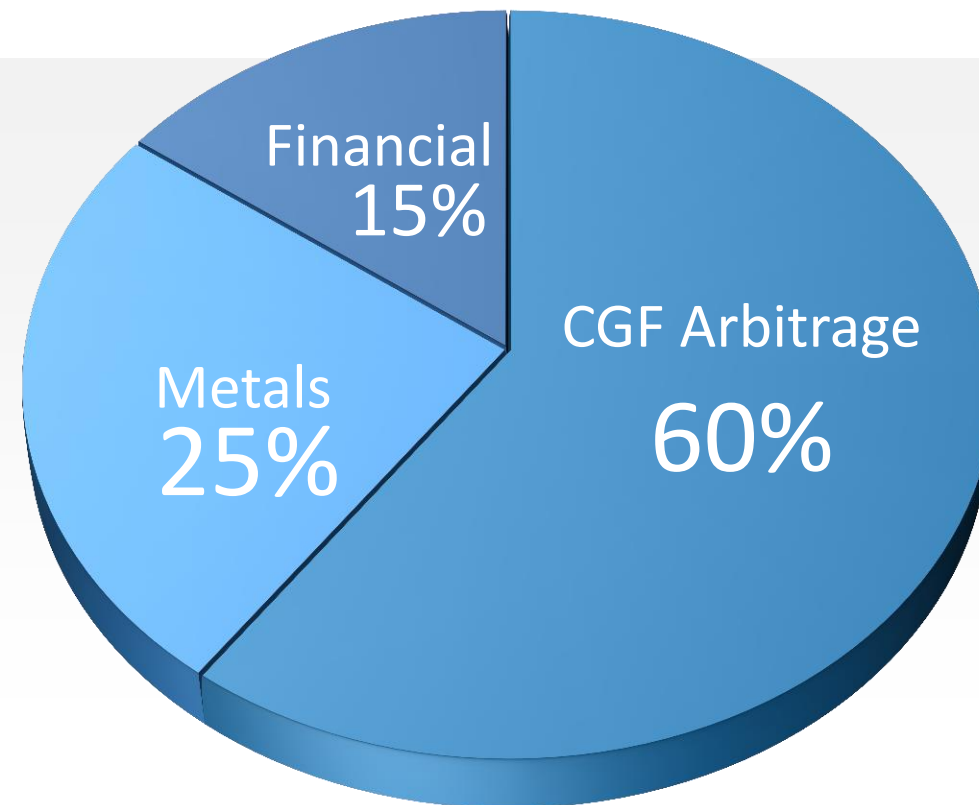

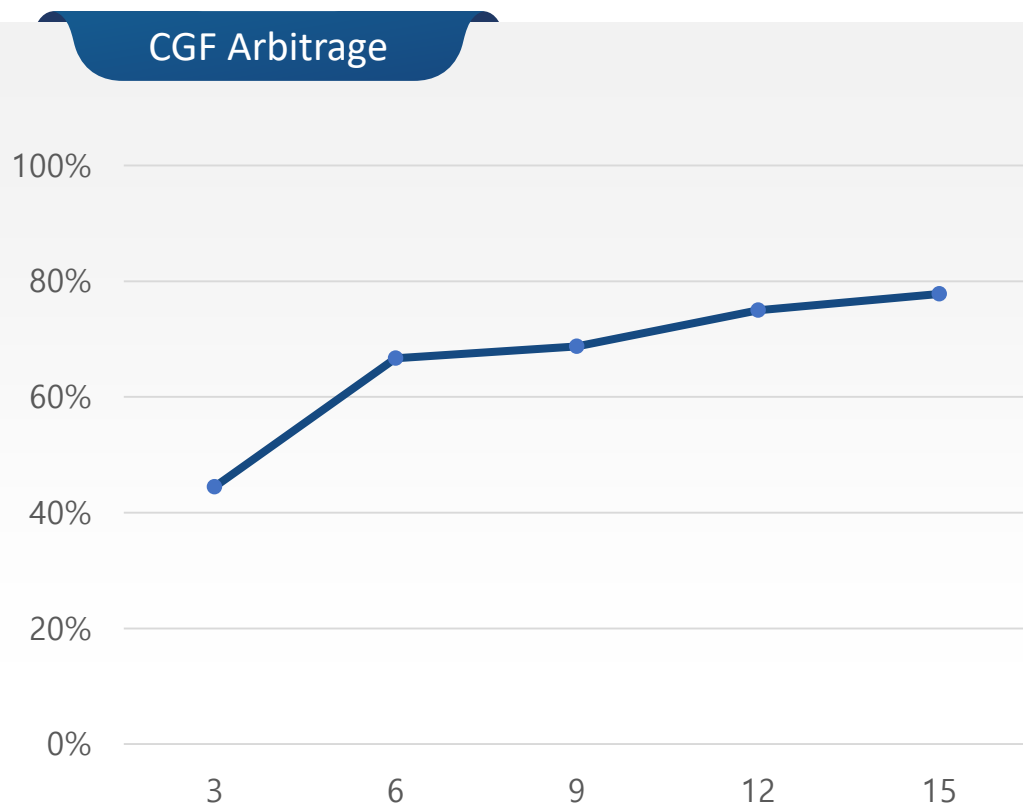

CGF coins are used in the following distribution

Developing a puzzle game that can be easily accessed and enjoyed by both boys and girls in the gaming market, which is developing into a huge capital market, issue a game coin and decenter the game coin for the first time in the world.

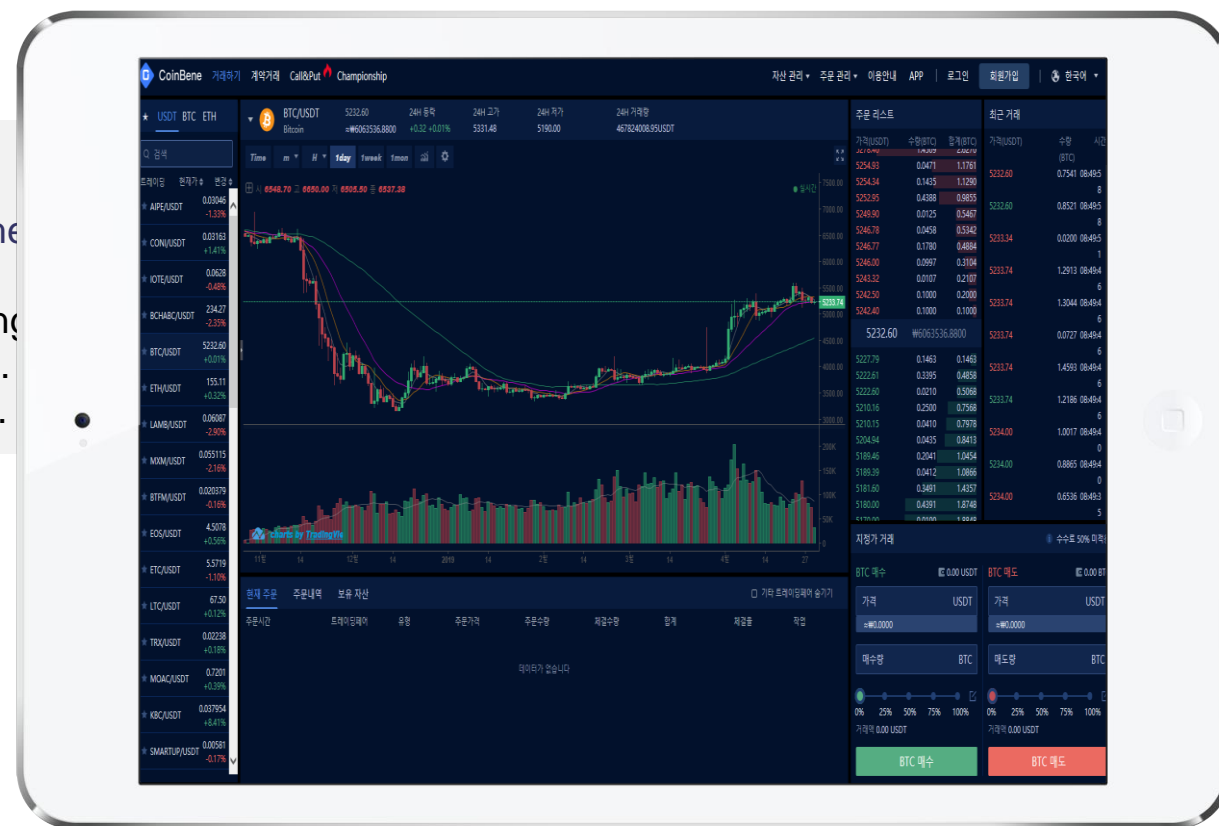

- * FX, futures, precious metals, bonds and other financial derivatives.
- * 50% to 100% of monthly profit data is presented transparently last one year

CGF aims to provide services that maximize the value of coins by providing a transparent and reliable business model that utilizes the blockchain technology.

CGF Exchange

The CGF Exchange will be opened for safe and easy transaction of the market, which was the main axis of the 4th Industrial Revolution. It provided many members with differentiated items from other exchange and provided the opportunity of profit generation to secured members. CGF Exchange will make money by converting into a huge exchange.
