**CGF**

- ✓ Company : Collibra Holdings U.S.A
- ✓ Regions : California U.S.A
- ✓ Categories : Finance, Arbitrage

The company behind the platform

**CGF is the foundation of a data management platform for Citizens.** We build and sell software and operate profitable model and provide professional services to accelerate customer travel with true data governance.

We also run the **Collibra University** to host the **Collibra community** for our clients and host annual Data citizens conference and data citizen city tour around the world.

Collibra provides true data governance to businesses through its regional offices in **U.S.A.** and **Europe** and partners in **Asia**, the **Middle East** and **South America**.

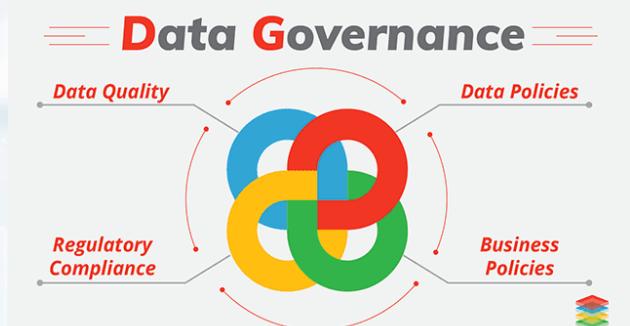

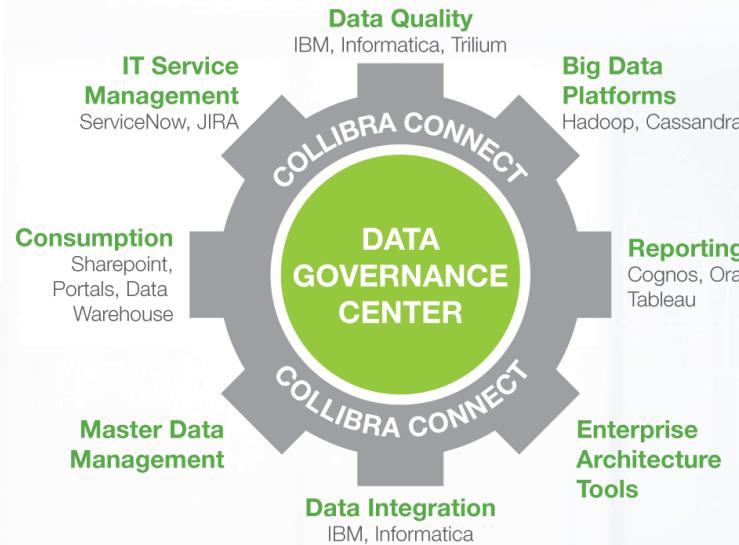

This is true data governance.

Collibra is a true data management

**Data governance platform that provides openness and freedom.**  
It decomposes into existing data and opens up organizational data so that every user can find the data they need, collaborate on it, and easily understand what they mean.

Above all, collibra ensures that all data citizens can trust the data.  
Collibra has the full potential to drive a competitive advantage.  
Who does not want it? In the end, it is your data.

## Collibra attracts \$100 million in funding rounds led by CapitalG ... Exceeded enterprise value of \$ 1 billion

Collibra, a leader in enterprise data governance and catalog software, has announced that it has received \$ 100 million in Series E funding. As a result, Collibra's after-investment **enterprise value has exceeded \$ 1 billion**, and venture funding totaled \$ 233 million. **Alpha Growth Capital CapitalG, the leading capital investment fund**, led the round, with existing investors including ICONIQ Capital, Index Ventures, Dawn Capital and Battery Ventures. Prior to this funding, Collibra recorded record revenue growth of 80% in annual revenue for the past year and rapidly expanded its business in the global market. With this investment attraction, we plan to expand our product portfolio and accelerate growth throughout the business. Collibra will also strengthen its artificial intelligence and machine learning capabilities to build smart catalog product automation on the cloud native platform, while enabling data science teams to drive advanced analytics business

"Collibra restores corporate data control, helps companies comply with changing regulations, embraces emerging technologies, and helps them identify information for future-oriented services and solution design," said Derek Zanutto of Capital G. . "Our partnership with Collibra is expected to combine the expertise of Google and the alphabet on machine learning and AI with Collibra's high-level capabilities in data collaboration, workflow management and risk management." More than 300 customers in a variety of industries, including financial services, healthcare, retail and technology, are using Collibra's platform, spurring data-driven digital innovation. Collibra plays a role like the 'Data Chief Officer' (CDO) of each company by strategically approaching data and maximizing the value of the data in terms of the customer.

Collibra CEO and co-founder Felix Van de Maele said: "Today's innovators are more data-driven than ever. In other words, data has become the most valuable asset. This investment outcome demonstrates Collibra's leadership and capabilities to support business innovation through data-driven insights. Through this round of investment, we have the opportunity to further enhance our data expertise, which has helped our clients leverage cutting-edge innovation to drive their digital innovation journey. " Collibra has been recognized by the data and technology industry for its award-winning performance and has been named the Forbes Top 100 Cloud Company for the last two consecutive years. For the third consecutive year, Gartner Magic Quadrant was selected as a leader in metadata management solutions. In addition, it was selected for the Forrester Wave™: Machine Learning Data Catalog category, and Forrester Wave™: Data Governance Management and Discovery Supplier.

## Google Investment Arbitre leads \$ 100 million investment in data technology company Collibra

Capital G, the investment arm of Google's parent company, has led \$ 100 million in funding from Collibra, the founder of data technology.

With this investment, Collibra has a value of more than \$ 1 billion, Fortune Property Board said. Other investors involved in recent funding include ICONIQCapital, IndexVentures, DawnCapital, and Battery Ventures.

Collibra specializes in so-called data governance technologies that allow organizations to manage corporate data to comply with regulatory standards and track who has access to specific files and domains. Her information Collibra's CEO and co-founder Felix Van de Maele said that Collibra's first customers included banks that had to comply with stricter regulations in the aftermath of the 2008 financial crisis.

Collibra is now committed to strict data privacy laws in Europe - companies that meet the common data protection regulations and companies that are preparing for them. The Privacy Act of the United States follows the recent California Privacy Act, which has been in effect since 2020.

The company's technology allows companies to set policies on how certain data, such as social security numbers and e-mail, can be used throughout an organization to prevent regulation.

Collibra's tools can also manage sales data by connecting to data stores stored in locations such as AmazonWebServices, MicrosoftAzure, and software in Salesforce. Perhaps, this will make it easier for people to find information scattered in other databases.

Felix van de Malle likens the service of how the library keeps books and gives visitors tools such as an index card to help them find the book they are looking for.

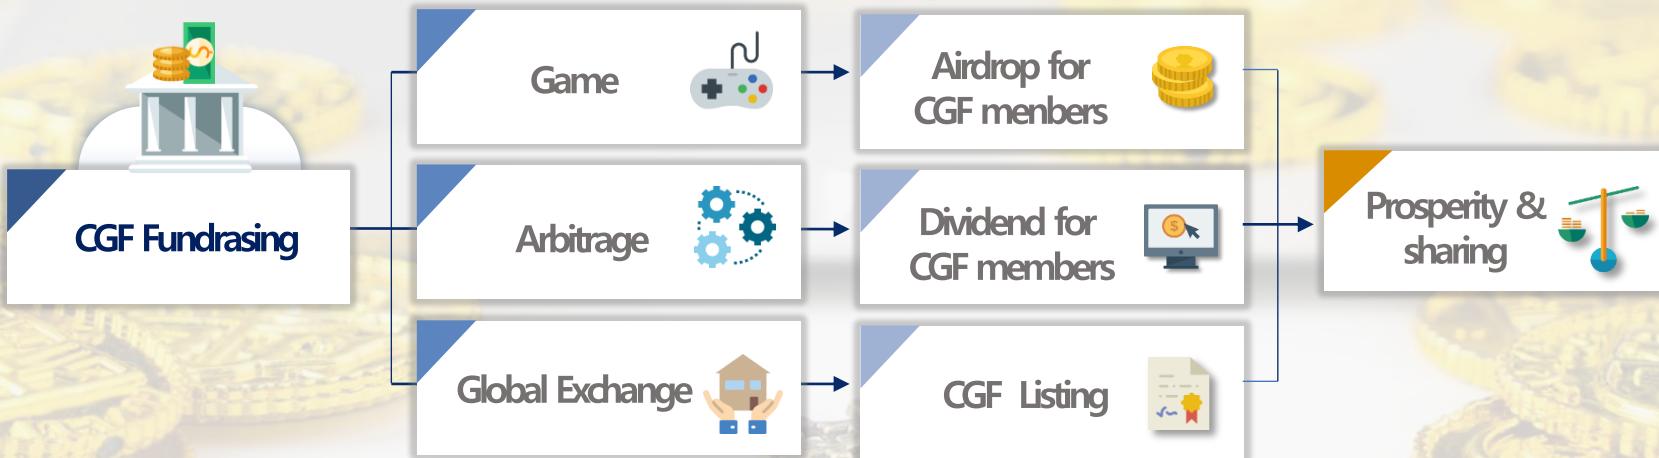

## CGF Coin

**CGF** is a coin based on ERC-20, which is a basic coin for securing fund necessary for exchange, arbitrage, and block chain game
